Bug Fixes

- [DST-17604] User Preferences: saving, returning to the calling Screen and refreshing triggers user preferences validation
- [DST-17687] Contact List: navigating using the hyperlinks and returning to the contact list causes APPERR031
- [DST-17671] From any screen selection of User Preferences and Cancel returns to the screen but leaves the url as /userpreferences/userpreferences.xhtml
- [DST-17674] Merge; the Merge process fails if the Source Offender has an AP Referral with an External Reference populated
- [DST-17629] Alerts Diary - Deleting certain search results generates a system error
