- [DST-17290] 2d. Changes to the Add Drug Test screen
- [DST-16070] 1b. Reference Data Screen additions for Drugs

#### Bug Fixes

---

- [DST-18736] Edit/Undo PSS which has been started by the script: PCOM (Start of Post-Sentence Supervision Requirement) Contact isnt auto deleted (like an ND created one is)
- [DST-18701] UPW Hours label issue and blank screen on CPRO sentence
- [DST-18605] Deeplinks are case sensitive and result in 'Missing values' error: Offender Id not on input parameters and can't be derived from event or component
- [DST-18604] RegisterSummary deeplink for soft deleted CRN (with no events): FAUERR001 instead of OIERR001

- [DST-18768]** Commence PSS: Difference between script and ND when viewing a row in the Rejected Transfer Diary (for the rejected pending licence condition transfer)
- [DST-18758]** Register Summary Screen - Filter options not preserved
- [DST-18784]** IPP Alert script; records not returned for "within" script as both First and Latest Release Dates are being checked
- [DST-18669]** Add Template; APPERR031 displayed when attempting to upload a file with no extension
- [DST-18737]** Add Adjustments - Adjustments are not sorted alphabetically
- [DST-18771]** IPP Alert scripts; Supervision of indeterminate sentences policy framework URL not included in Notes correctly
- [DST-18698]** When the script Commences the PSS and rejects any LC pending transfers, the Rejected Transfer Diary shows Notes = N when there are notes
- [DST-18733]** Commence PSS by script: AC and Story description just say to 'send an update' to IAPS, comparing to ND Commence PSS where only IAPS\_EVENT flag is set to '1' for update (script is setting IAPS\_OFFENDER)
- [DST-18732]** Edit/Undo PSS which has been started by the script: CPSS (Start of Post-Sentence Supervision) Contact isnt auto deleted (like an ND created one is)
- [DST-18304]** Add/Update drug test appointment tooltips
- [DST-18697]** When the script Commences the PSS and rejects any LC pending transfers, the contact is being created as Alert = No when it should be Yes (and other differences)
- [DST-18552]** View Drug Test: Duplicate last touch/timestamp on notes field
- [DST-18708]** Commence PSS script: AC asks for actual start date to be added to the PSSRs but script doesnt do this. Also SGC check.

## Problems

---

- [DST-18744]** S/N INC2873335 PR320 Additional Offences bookmark

## Scripts

---

- [DST-18617]** 2a. IPP Alert - Catchup Script - Passed 4 month period
- [DST-18651]** 2b. IPP Alert - Catchup Script - Within 4 Month Period
- [DST-18619]** 2c. IPP Alert - Weekly Script
