Bug Fixes

[DST-14704] Domain Event (DB mechanism); Entity Stories reference "message attributes" that are not defined in the Self Publish Stories

[DST-14789] Add Contact Details - Description field is editable when Warning message is displayed

[DST-14776] Move Recall NSI at Person Level: Domain event for the 'recall.raised' shows as "eventNumber":null (when it should be "eventNumber":"0")

[DST-14779] New action on Save button on Add Contact - Warning screen stops Child Contact creation

[DST-14777] APPERR031 after attempting to recover a deleted Recall NSI (at person level)

[DST-14802] New domain 'DOMAIN_EVENT_TYPE' in PDM 28.13 should not include underscores

[DST-14782] Update Enforcement Action doesnt display a Contact Type, when one is set

[DST-14787] Add RAR contact linked to the Requirement: Notes have not been added to the child contact

Problems

[DST-13604] Incident 1895269 PR221 - Termination Contacts
