

Release Notes

Version ND 6.8.10

Bug Fixes

- [DST-22626]** Add Registration and Add Deregistration story descriptions still indicate that final third needs to have been reached, but this isnt the process now
- [DST-22625]** Event Details : Population of field 'Final Third Expected Start Date:' when there is a key date AND a FTHNA registration in place - clarification
- [DST-22634]** FTHNA stored procedure: Clarification on which tier value counts as 'criteria' (AC9 contradicted by the list above it)
- [DST-22642]** Final Third: FTHX trigger is firing unexpectedly when a pre sentence event is added (its the main offence INSERT that's triggered it)
